

**AMENDMENTS TO THE ABSTRACT:**

✓ Please amend the abstract found on the last page of the specification as filed as indicated below by underlining, strikeouts, or double bracketing.

A  
A game system is provided with a converting means including a voice input member, such as a microphone, ~~microphones~~ [[4]] for allowing the game player or his/her friend to input voices and for converting the inputted voices into electrical signal data, a sound data storage [[48]] for storing the electrical signal data obtained by the ~~converting means~~ conversion together with predetermined sound-relating data corresponding to contents of instructions, a sound generator ~~generating means~~ (47, 49, 7, 11) for generating voices from the corresponding electrical signal data when a game player makes a motion in response to the content of instruction, and [[an]] a device ~~evaluating means~~ for evaluating a game result based on the content of instruction. Accordingly, a sound output type game system which can provide more interesting and enjoyable games can be realized.
